2025/12/14 15:02 1/1 osFree distribution (draft I)

osFree distribution (draft I)

- osFree must use WarpIN as a package manager, with some enhancements
- support for repositories?
- response-file-driven installation:
 - 1. response-file can be created manually
 - 2. response-file can be created by UI (VIO or PM-based)
- so, installer must be divided into two separate parts:
 - 1. UI for choosing user options interactively, it can be:
 - textmode UI with pseudographics
 - graphical, PM-based
 - 2. installation engine, based on WarpIN with plugins.
 - it can be started by an experienced user, system administrator, or by the installation UI.
- also, DOS (DPMI)-based version of the installation engine and UI would be desired
- a Linux- or Win32-based version (?)
