Neutral personality servers

- Log server
- Name server (L4VFS name server)
- L4VFS servers. No file providers.
- Nitpicker as a core windowing server
- Loader/linker servers/libraries.
- DDE

Configuring

At the present time we reuse DROPS/TUD:OS project for most functionality of personality neutral servers. Some servers used as is and some with enchancements. Here is server names and description of it configuration and interfaces.

Log server

Log server is a first server loaded after root task. Goal of log server to provide logging service to osFree.
