

# osFree project

♥ Like it? Support us! 🧑🏻🧑🏼🧑🏽🧑🏾🧑🏿 Join us!

osFree is a FOSS (Free Open Source software) operating system development project, aiming to replace eventually all OS/2 subsystems with Open source analogues. It aims for OS/2 Warp 4 (Merlin) as a base compatibility system, which does not mean that we will not support features of newer (OS/2 Warp Server for e-business and eComStation) OS/2 versions. This includes rewriting not only user-level code but the OS/2 kernel too.

We're collecting existing code for OS/2 subsystems for years. Also we are developing our own bootloader named FreeLdr and OS/2 personality for L4 microkernel, i.e. a number of servers, implementing the Control Program (OS/2 kernel) Interface functionality in userspace. See [osFree design and development concept](#) for more details. [Visit the Chat Channel on the EFNET](#)

Our project is reusing the code of many [opensource projects](#).

## Project News

- Forums by [prokushev@users.sourceforge.net](mailto:prokushev@users.sourceforge.net) (Yuri Prokushev) (2009/09/05 16:17)

Registration in forums at [osfree.org](http://osfree.org) site is enabled recently. Please report forum bugs and render problems to us in "osfree.org site" forum.

- 0.0.4 release by [prokushev@users.sourceforge.net](mailto:prokushev@users.sourceforge.net) (Yuri Prokushev) (2009/09/03 09:06)

We released this preview to show actual possibility of LX executables (native OS/2 executable file format) to be run on top of L4. Output from LX executable is "I am really small!" phrase. Other things is debug output. Our executable uses msg.dll which uses doscalls.dll. So, linking also works. Also we present here osFree loader which allow to load as Multiboot compatible kernels as native OS/2 kernel. Loader is modular and easy to extend. Next release will provide some interactive like directory browsing and files execution. See roadmap at <http://www.osfree.org> for more info.

- New logo and site fixes by [prokushev@users.sourceforge.net](mailto:prokushev@users.sourceforge.net) (Yuri Prokushev) (2009/07/02 17:14)

We replaced our old logo by new modern one. Thanks to Alexander Kramer for this work. Also we fixed small annoying bugs in our CMS. Thanks to Kim Haverblad for the help.

- Better news service at #osFree by [prokushev@users.sourceforge.net](mailto:prokushev@users.sourceforge.net) (Yuri Prokushev) (2009/06/17 16:58)

Starting from now <irc://irc.efnet.net#osfree> channel supports rss news translation to channel. You will see any changes of project immediatly. Thanks to Yoda for bot extending.

- EFNet bots changed by [prokushev@users.sourceforge.net](mailto:prokushev@users.sourceforge.net) (Yuri Prokushev) (2009/04/25 06:57)

EFNet bots osfreebot and osfree is dead. We are glad to present new bot: osFree2. Thanks to Yoda for

bot hosting.

- FreePM project now part of osFree project by [prokushev@users.sourceforge.net](mailto:prokushev@users.sourceforge.net) (Yuri Prokushev) (2009/04/08 17:32)

FreePM project now part of osFree project. All source base now in osFree SVN and some goals slightly changed (like SOM interfaces instead of C++ interfaces and binary level compatibility instead of source level compatibility). Most of services disabled and now osFree project services must be used. Thanks to Evgen Kotsuba for the help.

- New team member by [prokushev@users.sourceforge.net](mailto:prokushev@users.sourceforge.net) (Yuri Prokushev) (2009/02/19 16:17)

Vadim (Oxyd) Priluzkiy joined to osFree project. Welcome here!

- sf.net news now duplicated at [osfree.org](http://osfree.org) by [prokushev@users.sourceforge.net](mailto:prokushev@users.sourceforge.net) (Yuri Prokushev) (2008/09/03 19:11)

Starting from now project news from sf.net shown on main page of [osfree.org](http://osfree.org)

## Roadmap

We're now at the **alpha** stage, which means that the current version is **not feature-complete nor stable** and not recommended for everyday usage. The 0.0.x release series will still stay in alpha stage, and 0.9 release series will be marked as beta, meaning a system which is suitable for every day use.

The next release will be 0.0.5, with an earliest projected release date being December, 2009. See our osFree roadmap for details.
