

[Q]: Как русифицировать StarOffice v 5.1?

[A]: Yury Tarasievich (2:451/4)

Сделал патч для кириллизации StarOffice 5.1. Вроде бы работает корректно, и ничего не ломает. Пока что НЕ помогает при импорте/экспорте форматов Word 97 и HTML. Патч предоставляется As Is и без всяких гарантий.

Перед наложением патча распаковать модуль TL516CO.DLL утилитой LxLite версии 1.2.1 (возможно, подойдёт и другая версия, в патч встроена простейшая проверка корректности распаковки). Скопировать патч в каталог, где размещён StarOffice 5.1. Наложить патч при помощи штатной утилиты os/2 patch.exe - patch.exe so51_cyr /a

<для StarOffice v 5.1a - использовать файлы TLS517CO.DLL и SO51ACYR>

Собственно патч помещён в SU.OS2.SRC. Приветствуется публикация с указанием авторства на WWW сайтах Russian Underground/2 и Teamos2/Russian.
