osFree Janus Version

Simple application which shows the standard About dialog from SHELL.DLL or built-in About dialog box. The appearance of the dialog depends on the underlying implementation.

Features and Compatibility

- **Priority to System Library (SHELL.DLL):** Upon startup, the program attempts to load the `SHELL.DLL` library and call the standard `ShellAbout()` function. This displays the exact same dialog window found in the original system, including all version-specific elements.
- **Fallback Mode:** If `SHELL.DLL` is unavailable or if the function call fails, the application does not terminate with an error. Instead, it displays its own built-in dialog window.

Download

You can download the source code and binaries from GitHub. osFree Janus Version is released under the LGPL-2.1 license.
