

# osFree Janus Version

Simple application which shows the standard About dialog from SHELL.DLL. The appearance of the dialog depends on the underlying implementation.

## Features and Compatibility

- **Priority to System Library (SHELL.DLL):** Upon startup, the program attempts to load the SHELL.DLL library and call the standard ShellAbout() function. This displays the exact same dialog window found in the original system, including all version-specific elements.
- **Fallback Mode:** If SHELL.DLL is unavailable or if the function call fails, the application does not terminate with an error. Instead, it displays its own built-in dialog window.

## Download

You can download the source code and binaries from [GitHub](#). Windows Version is released under the LGPL-2.1 license.
